

AP-LITE

Don't need the standard water quality sensors? Have a specific monitoring need? The AP-LITE is for you

The AP-LITE is highly portable with its probe body measuring just 24mm in diameter and 250mm in length.

The probe body can accept any of our optical sensors - just screw the sensor in!

The AP-LITE is used with the GPS Aquameter for data recording, calibration and location tagging.

Optical Sensors: Turbidity, Chlorophyll, Blue Green Algae, Rhodamine, Fluorescein, Refined Oil.
